

Kyndryl Establishes Technology Hub in Liverpool to Create Up to 1,000 AI-related and Software Engineering Jobs

February 26, 2025

New tech hub will embrace the UK government's ambition to deploy AI across the country and foster the next generation of talent

LIVERPOOL, England, Feb. 26, 2025 /PRNewswire/ -- Kyndryl (NYSE: KD), the world's largest IT infrastructure services provider, today announced the launch of a new technology hub in Liverpool that will support the digital transformation of UK and global customers. Kyndryl will create up to 1,000 software engineering and AI-related jobs over the next three years to drive AI and technology innovation in the Liverpool City Region.

The Secretary of State for Science, Innovation and Technology, Peter Kyle, said, "Kyndryl's new technology hub in Liverpool is a clear example of how AI is already driving economic growth, delivering our plan for change by putting AI to work for communities across the country. This investment is a resounding vote of confidence in our world-leading AI sector and the new blueprint for the technology we're delivering."

Led by [Kyndryl Consult](#), the new technology hub will include a Kyndryl Vital Studio. The studio will offer a designer-led, open and collaborative co-creation experience that will allow customers to tackle complex and real-world business challenges. Kyndryl Consult's advisory services will help businesses adopt and implement AI, software and platform engineering solutions and other emerging technologies.

As part of the new hub opening, Kyndryl is expanding its partnership with The Very Group, the Liverpool-based operator of digital retailers Very and Littlewoods, through a new multiyear agreement designed to enhance and accelerate the retailer's end-to-end digital capabilities. Kyndryl will provide comprehensive software and platform engineering support, helping The Very Group launch new products at speed and enhance the digital customer experience.

John Chambers, Kyndryl United Kingdom & Ireland President, said, "Liverpool's growing reputation as a hub for digital excellence – reinforced by the success of last year's [International AI Summit](#) – underscores our decision to invest in the region's exceptional talent. This step, as well as Kyndryl's expansion of our relationship with The Very Group, reflects Kyndryl's commitment to nurturing the skills needed to accelerate AI adoption, advance digital transformation and drive meaningful economic growth across the UK."

Steve Rotheram, Mayor of the Liverpool City Region, said, "This is fantastic news for the Liverpool City Region and proof of what we can achieve when local ambition is backed by national support to attract global investment. I'm really pleased that we've been able to bring Kyndryl here, following discussions during our trade mission to New York last year. AI and digital technology are already transforming industries across the country – and I want our region to be at the forefront of that change. We've got the talent, the infrastructure, and the ambition to make sure the benefits of this tech revolution aren't just felt in London and the South East, but right here in the North too. This investment will create good, well-paid jobs and give people the skills they need to succeed in the industries of the future. It's a massive boost for our economy – but more importantly, it's an investment in our people and their potential. The Liverpool City Region is ready to lead the way."

Kyndryl, with its rapidly growing consulting business, continues to support organisations in their digital transformation journey by attracting and nurturing top talent. By developing the skills of the next generation, Kyndryl aims to address the increased demand for advanced digital expertise, which will be crucial for driving economic growth across the UK. Kyndryl's new early careers program in the UK, starting with digital technology degree apprenticeships, reflects its belief that investing in talent is crucial for maintaining the UK's leadership in innovation and AI adoption.

Leveraging Kyndryl's infrastructure expertise, the technology hub will help companies integrate mission-critical operations with business applications, using global partnerships to accelerate digital and AI transformations. This investment exemplifies Kyndryl's dedication to fostering innovation, driving economic growth and building the next generation of digital leaders through comprehensive training and skills development initiatives, and it aligns

with the [UK Government's AI Opportunities Action Plan](#) and the [recent UK Government announcement](#) which seeks to position the UK as a global leader in AI.
