Disclaimers

Forward-looking statements
This presentation contains “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements often contain words such as “will,” “anticipate,” “predict,” “project,” “plan,” “forecast,” “estimate,” “expect,” “intend,” “target,” “may,” “should,” “would,” “could,” “outlook,” “believe” and other similar words or expressions or the negative thereof or other variations thereon. All statements, other than statements of historical fact, including without limitation statements representing management's beliefs about future events, transactions, strategies, operations and financial results, may be forward-looking statements. These statements do not guarantee future performance and speak only as of August 7, 2023, and the Company does not undertake to update its forward-looking statements. Actual outcomes or results may differ materially from those suggested by forward-looking statements as a result of risks and uncertainties which include, among others: risks related to the Company’s spin-off from International Business Machines Corporation (“IBM”); failure to attract new customers, retain existing customers or sell additional services to customers; technological developments and the Company's response to such developments; failure to meet growth and productivity objectives; competition; impacts of relationships with critical suppliers and partners; inability to attract, retain and/or manage the numbers of key personnel and other skilled employees; impact of local legal, economic, political, health and other conditions; a downturn in economic environment and customer spending budgets; damage to the Company's reputation; inability to accurately estimate the cost of services and the timeline for completion of contracts; its implementation of a new enterprise resource planning system and other systems and processes; service delivery issues; the Company's ability to successfully manage acquisitions, alliances and dispositions, including integration challenges, failure to achieve objectives, the assumption of liabilities, and higher debt levels; the impact of our business with government customers; failure of the Company's intellectual property rights to prevent competitive offerings and the failure of the company to obtain necessary licenses; risks relating to cybersecurity and data privacy; adverse effects from tax matters and environmental matters; legal proceedings, investigatory risks and potential indemnification obligations; impact of changes in market liquidity conditions and customer credit risk on receivables; the Company's pension plans; the impact of currency fluctuations; risks related to the Company's common stock and the securities market; and other factors described in the "Risk Factors" section of the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2023 filed with the Securities and Exchange Commission (the "SEC") on May 26, 2023, as such factors may be updated from time to time in the Company's periodic filings with the SEC.

Non-GAAP financial measures
Financial information contained in this presentation includes certain financial measures that are calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting policies in the United States of America (GAAP), such as adjusted EBITDA, adjusted pretax income (loss), adjusted net income, adjusted EPS, adjusted EBITDA margin, adjusted pretax margin, adjusted free cash flow and constant currency, which include or exclude certain items from the most directly comparable GAAP financial measure. These non-GAAP measures differ from reported GAAP measures and are intended to illustrate what management believes are relevant period-over-period comparisons and are helpful to investors as an additional tool for further understanding and assessing Kyndryl's expected ongoing operating performance. Exclusion of items in our non-GAAP presentation should not be considered an inference that these items are unusual, infrequent or non-recurring. Definitions of the non-GAAP measures are included in the appendix of this presentation. A reconciliation of non-GAAP financial measures for historical periods to the most directly comparable GAAP financial measure appears in the appendix to this presentation. Any non-GAAP financial measure used in this presentation is in addition to, and not meant to be considered superior to, or a substitute for, measures prepared in accordance with GAAP. A reconciliation of forward-looking non-GAAP financial information is not included in this presentation because the individual components of such non-GAAP reconciliation are not currently available without unreasonable effort. For the same reasons, we are unable to address the probable significance of the unavailable information, which could be material to future results. Additionally, certain amounts may not add due to the use of rounded numbers; percentages presented are calculated based on the underlying amounts.

Highlights

First quarter results demonstrate a **strong, fast start** to our fiscal year

**Alliances, Advanced Delivery and Accounts** initiatives delivering greater benefits

**Raising profit outlook** for current fiscal year (ending March 2024)

Extending our leadership position as the **largest** provider of IT infrastructure services

We design, build, manage and modernize the mission-critical systems that the world depends on
Successfully transforming our business

Faster profit recovery
- Raising fiscal 2024 outlook
- Annual losses, measured on an adjusted pretax basis, are behind us
- Relentless execution of three-A’s strategy

On track for revenue growth in calendar 2025
- Kyndryl Consult growing double-digits – now targeted to reach 20% of our revenue by fiscal 2027
- Alliances delivering ahead of pace
- Addressing our focus accounts, while retaining higher-margin content
- Will finish this fiscal year near our revenue trough

Adjusted pretax income / margin
- Fiscal 2023: (1.3%)
- Fiscal 2024E: At least $100 million
- Medium-term: High single digits

Free cash flow expected to grow similarly, with strong conversion of adjusted net income to cash

We’re driving powerful dynamics for near-term and medium-term value creation

Previous expectation was for Consult revenue that was ~10% of revenue at spin to grow to ~15% over the medium term
Delivering additional benefits from our three-A’s in fiscal 2024

**Alliances**
Driving signings, certifications and revenues with our new ecosystem partners and capabilities

- **$80M+** Hyperscaler revenue in Q1 ($300M+ fiscal year 2024 target)
- **37,000+** Cloud certifications as of June 2023 (total hyperscaler certifications up 70% year-over-year)

**Advanced Delivery**
Transforming service delivery through upskilling and automation

- **$375M** Annualized savings from automation ($450M+ cumulative target for March 2024)
- **$75M** Of year-over-year earnings benefit in Q1 ($200M+ fiscal year 2024 target)

**Accounts**
Addressing elements of the business with substandard margins

- **$300M+** Annualized profit improvement ($400M+ cumulative target for March 2024)
- **$90M+** Of year-over-year earnings benefit in Q1 ($200M+ fiscal year 2024 target)

Our accelerated progress on the three-A’s is demonstrating our ability to return to sustainable, profitable growth

kyndryl
Financial overview

- Solid quarterly results show continuing progress
- Robust balance sheet and strong liquidity
- Raising profit outlook for current fiscal year (ending March 2024)

### Quarterly revenue by segment ($ in millions)

- **United States**: $1,164
- **Japan**: $1,484
- **Strategic Markets**: $935
- **Principal Markets**: $610

---

Our results for the quarter reflect solid operational execution, led by our three-A initiatives and Kyndryl Consult.
Strong balance sheet metrics; seasonal dynamics affecting cash flow

We’re expecting positive adjusted free cash flow in fiscal 2024 and on a solid financial footing to execute our strategy

1 Consists of $1.5B of cash and $3.2B of undrawn senior unsecured credit facility

2 Driven by annual incentive/commission outlays that exceeded in-quarter accruals by ~$115M, software license payments that exceeded in-quarter amortization by ~$50M, and cash tax payments of $65M

3 Adjusted free cash flow: Cash flow from operations (GAAP) ($173M), plus workforce rebalancing payments $79M, transaction-related payments $42M, significant litigation payments $33M and other $7M, less net capital expenditures $94M. See appendix for reconciliation of non-GAAP metrics

Debt

$1.8B
Net debt

($173M)
Cash flow from operations
Projected margins on signings up meaningfully, supporting medium-term goals

**Gross margin**
- Expected on post-spin signings
  - June 2022: ~23%
  - December 2022: ~25%
  - June 2023: ~26%

**Pretax margin**
- Expected on post-spin signings
  - June 2022: ~6%
  - December 2022: ~8%
  - June 2023: ~9%

Supports our medium-term margin target

Execution on our three-A's and focus on higher-value services are driving margin expansion on signings post-spin
Over the medium term, our initiatives will contribute to profit growth

We’re focused on delivering on our three-A initiatives, innovation and margin expansion

Fiscal 2024 revenue outlook for revenue is (8%) to (6%) growth in constant currency, to $15.8 to $16.2B based on recent exchange rates. Currency effects are currently expected to positively impact revenue by $200M or 130 bps, adjusted EBITDA by $60M or 20 bps, and adjusted pretax income by $25M or 20 bps year-over-year. Depreciation expense projected to be ~$850M; amortization expense projected to be ~$1.2B; interest expense projected to be ~$120M. Net capital expenditures projected to be ~$750M. ~$300M of cash projected to be used for transaction-related items, primarily post-Separation systems migration costs, and workforce rebalancing programs.
Transforming focus accounts into higher-value ‘blueprint’ accounts

Revenue (at spin)¹

Focus accounts
~$8B / ~40%

‘Blueprint’ accounts
~$10B / ~60%

Starting point

~0% average gross margin

Post-spin signings¹

Low to mid-20s gross margin

Focus accounts driving substantial margin accretion

Mid-20s average gross margin

Mid-20s gross margin

Margins increasing modestly even in ‘blueprint’ accounts

1 Revenue represents historical (GAAP) revenue for the twelve months ended March 31, 2022; post-spin signings and revenue were ~40% focus accounts and ~60% blueprint accounts. Our gross margins are approximately 16 points higher than our adjusted pretax margins.
Investment highlights

- World leader in designing, building, managing and modernizing mission-critical information systems
- Independence doubled our addressable market from $240 billion pre-spin to $530 billion by 2025, with market growth driven by numerous interrelated tailwinds
- Competitive advantage stems from our people, data and intellectual property
- Trusted long-term partner to thousands of blue-chip enterprise customers
- Freedom to invest for growth while expanding our ecosystem of strategic partners and service capabilities, enhancing customers' access to a wider range of technology solutions
- Strong financial characteristics with annuity-like annual revenues, double-digit adjusted EBITDA margins and investment-grade credit ratings
- Focused, growth-oriented culture, committed to high ESG standards and led by a highly experienced executive team

---

Numbers may not add due to rounding.

1 Other adjustments represent pension costs other than pension servicing costs and multi-employer plan costs, significant litigation costs and currency impacts of highly inflationary countries.

2 Operating margin is calculated by dividing net income (loss) less income taxes, interest expense and other expense (income), by revenue.
## Definitions and rationale for non-GAAP metrics

<table>
<thead>
<tr>
<th>Metric</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Adjusted EBITDA and adjusted EBITDA margin</td>
<td>Adjusted EBITDA is defined as net income (loss) excluding net interest expense, income taxes, depreciation and amortization (excluding depreciation of right-of-use assets and amortization of capitalized contract costs), charges related to ceasing to use leased/fixed assets, charges related to lease termination, transaction-related costs, pension costs other than pension servicing costs and multi-employer plan costs, stock-based compensation expense, workforce rebalancing charges, impairment expense, significant litigation costs, and foreign currency impacts of highly inflationary countries. Adjusted EBITDA margin is calculated by dividing adjusted EBITDA, as defined above, by revenue. Management uses adjusted EBITDA and adjusted EBITDA margin to evaluate our performance. Management also uses these metrics when publicly providing our business outlook. We believe they are a helpful supplemental measure to assist investors in evaluating our operating results as they exclude certain items whose fluctuation from period to period do not necessarily correspond to changes in the operations of our business. Adjusted EBITDA and adjusted EBITDA margin are financial measures that are not recognized under U.S. GAAP and should not be considered as an alternative to net income (loss) or other measures of financial performance or liquidity derived in accordance with U.S. GAAP.</td>
</tr>
<tr>
<td>Adjusted pretax income and adjusted pretax margin</td>
<td>Adjusted pretax income is defined as pretax income excluding transaction-related costs, charges related to ceasing to use leased/fixed assets, charges related to lease termination, pension costs other than pension servicing costs and multi-employer plan costs, stock-based compensation expense, amortization of acquisition-related intangible assets, workforce rebalancing charges, impairment expense, significant litigation costs and foreign currency impacts of highly inflationary countries. Adjusted pretax margin is calculated by dividing adjusted pretax income, as defined above, by revenue. Management uses adjusted pretax income and adjusted pretax margin to evaluate our performance. Management also uses them when publicly providing our business outlook. We believe adjusted pretax income and adjusted pretax margin are helpful supplemental metrics for investors in evaluating our operating performance because they can be used by investors to measure a company's operating performance without regard to items excluded from the calculation of such measures, which can vary substantially from company to company. Adjusted pretax income and adjusted pretax margin eliminate the impact of expenses that do not relate to core business performance. These measures are financial measures that are not recognized under U.S. GAAP and should not be considered as an alternative to net income (loss) or other measures of financial performance or liquidity derived in accordance with U.S. GAAP.</td>
</tr>
<tr>
<td>Adjusted net income, adjusted net margin and adjusted earnings per share (EPS)</td>
<td>Adjusted net income is defined as adjusted pretax income less the reported provision for income taxes, minus or plus the tax effect of the non-GAAP adjustments made to calculate adjusted pretax income, and excluding exceptional items impacting the reported provision for income taxes. Adjusted net margin is calculated by dividing adjusted net income by revenue. Adjusted earnings per share (EPS) is defined as adjusted net income divided by diluted weighted average shares outstanding to reflect shares that are dilutive or anti-dilutive based on the amount of adjusted net income. Management uses adjusted net income, adjusted net margin and adjusted earnings per share to evaluate our performance. Management also uses them when publicly providing our business outlook. We believe adjusted net income and adjusted margin are helpful supplemental metrics for investors in evaluating our operating performance because they can be used by investors to measure a company's operating performance without regard to items excluded from the calculation of such measures, which can vary substantially from company to company. Adjusted earnings per share can be used by investors to evaluate operating performance attributable to equity shareholders. These measures are financial measures that are not recognized under U.S. GAAP and should not be considered as an alternative to net income (loss) or other measures of financial performance or liquidity derived in accordance with U.S. GAAP.</td>
</tr>
</tbody>
</table>
### Definitions and rationale for non-GAAP metrics (continued)

<table>
<thead>
<tr>
<th>Metric</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Constant-currency</strong></td>
<td>Constant-currency information compares results between periods as if exchange rates had remained constant period over period. We define constant-currency revenues as total revenues excluding the impact of foreign exchange rate movements and use it to determine the constant-currency revenue growth on a year-over-year basis. Constant-currency revenues are calculated by translating current period revenues using corresponding prior-period exchange rates. Management uses constant-currency measures to evaluate period-over-period operating performance on a more consistent and comparable basis. We believe that presentation in constant-currency is a useful supplemental financial measure to aid investors in understanding of the Company's period-over-period operating performance and provides additional insight into historical and/or future performance.</td>
</tr>
<tr>
<td><strong>Adjusted free cash flow</strong></td>
<td>Adjusted free cash flow is defined as cash flow from operations after adding back transaction-related payments, workforce rebalancing payments, significant litigation payments and payments related to lease terminations and ceasing to use leased assets, less net capital expenditures. Management uses adjusted free cash flow as a measure to evaluate its operating results, plan strategic investments and assess our ability and need to incur and service debt. We believe adjusted free cash flow is a useful supplemental financial measure to aid investors in assessing our ability to pursue business opportunities and investments and to service our debt. Adjusted free cash flow is a financial measure that is not recognized under U.S. GAAP and should not be considered as an alternative to cash flows from operations or liquidity derived in accordance with U.S. GAAP.</td>
</tr>
<tr>
<td><strong>Signings</strong></td>
<td>Signings are defined by Kyndryl as an initial estimate of the value of a customer’s commitment under a contract. We calculate this based on various considerations including the type and duration of the agreement as well as the presence of termination charges or wind-down costs. Contract extensions and increases in scope are treated as signings only to the extent of the incremental new value. Signings can vary over time due to a variety of factors including, but not limited to, the timing of signing a small number of larger outsourcing contracts. The conversion of signings into revenue may vary based on the types of services and solutions, customer decisions and other factors, which may include, but are not limited to, macroeconomic environment or external events. Management uses signings as a tool to monitor the performance of the business including the business’ ability to attract new customers and sell additional scope into our existing customer base.</td>
</tr>
</tbody>
</table>
